

AI Generalists

AI Generalists = People who
solve problems using AI

AI Generalist is a full stack problem solver who:

- ◆ Has a deep understanding of all the AI models
- ◆ Understands which models to use where & how
- ◆ Has the ability to build solutions to solve complex problems using AI

No matter who you are, you need to be a rockstar
AI Generalist to win in the AI First world!

1

Entrepreneurs

Running
a startup

Running
a Business

Freelancers
/ Consultants

Hustlers!
Doing both
together

2

Working
Professionals

Currently working for a job and want
to be the best at it and grow faster
than most.

Let me share a roadmap to
become an AI Generalist!

Roadmap to become an AI Generalist

LEVEL 1

Foundations of AI and Language Models

LEVEL 2

Advanced Prompting, Retrieval, and Fine-Tuning

LEVEL 3

AI for Image and Video Creation

LEVEL 4

Automating Tasks with AI Agents

LEVEL 5

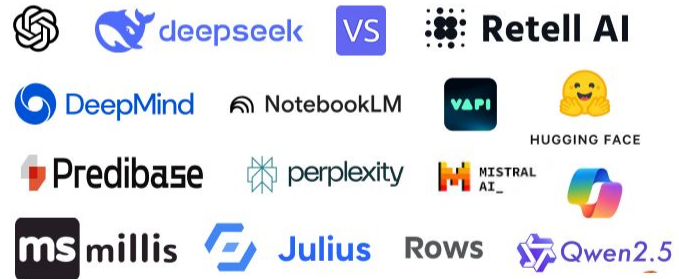

Building AI-Powered Applications

Level 1 & 2

Fundamentals of LLMs , RAGs , Advanced Prompt engineering

- Origins of LLMs: Where Did They Begin?
- How LLMs Work & Process Language?
- Fundamentals of Generative AI & its applications
- Master Basics to Advanced Prompting Technique
- Refinement & Finetuning of Prompts
- Learn RAG concepts & Build pipelines
- Identifying & Solving Biz Problems using Gen AI
- Learn how to create a conversational agent using NLP
- Understand Ethics, Responsibility & Safety in AI

CONCEPTS TO BE LEARNT

TOOLS TO BE LEARNT

Projects to explore

- ◆ Create system prompts
- ◆ Build your own RAG model that summarises your own documents
- ◆ Build a voice assistant using advanced prompting
- ◆ Build your own AI workflow for your problem statement
Ex: Build your own sales training bot , AI HR etc
- ◆ Create Claude projects, Build gemini gems
- ◆ Build copilot agents

Level 3

AI for Image and Video Creation

- The Science Behind Diffusion Models
- Introduction to Stable Diffusion & Comfy UI
- Style Transfer & Upscaling with AI
- Fine-Tuning Diffusion Models Using Comfy UI
- Generating Ultra-Consistent Characters with AI
- Building an AI Wrapper for Your Use Case
- AI-Powered Video Creation & Filmmaking
- Ad Filmmaking with AI

CONCEPTS TO BE LEARNT

HUGGING FACE

ComfyUI

stability.ai

TOOLS TO BE LEARNT

Projects to explore

- ◆ Build your own Image & video creation website like Leonardo AI
- ◆ Set up workflows for creating creative marketing collaterals
- ◆ Setup your own faceless Youtube channel using AI
- ◆ Develop a film using AI
- ◆ Create your own deep fake clones & start creating content
- ◆ Set up your own money making machine

Level 4

Automating Tasks with AI Agents

1. How automations work?
2. How to setup a process that can be automated?
3. Setting up automations?
4. Understanding AI agents?
5. Orchestrating AI agents?
6. Connecting multiple agents to build agent army?

CONCEPTS TO BE LEARNT

 **make**

 **creta.ai**

 **zapier**

 **Lindy**

 **n8n**

 **Relevance AI**

TOOLS TO BE LEARNT

Projects to explore

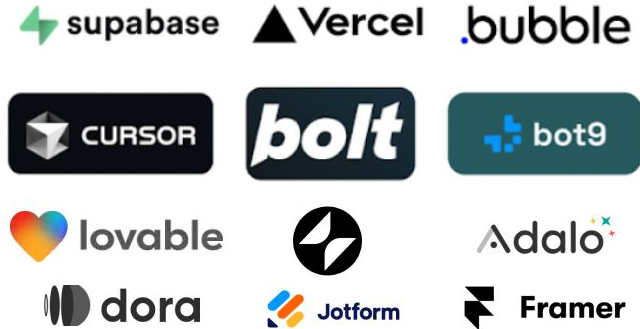

- ◆ Create your own personal executive assistant
- ◆ Build AI agents for marketing , customer support , research etc
- ◆ Create your own email manager
- ◆ Build your own automatic job applier
- ◆ Build your own voice agents that can speak & book appointments
- ◆ Create your own automations to automate mundane tasks like email , writing blog etc
- ◆ Build your own army of agents that can do all above tasks

Level 5

Building with AI without code

1. How to connect the AI & No code tools to build automations
2. Understanding No code interfaces
3. Learning design thinking UI & UX
4. Building MVP using low code & AI

CONCEPTS TO BE LEARNT

TOOLS TO BE LEARNT

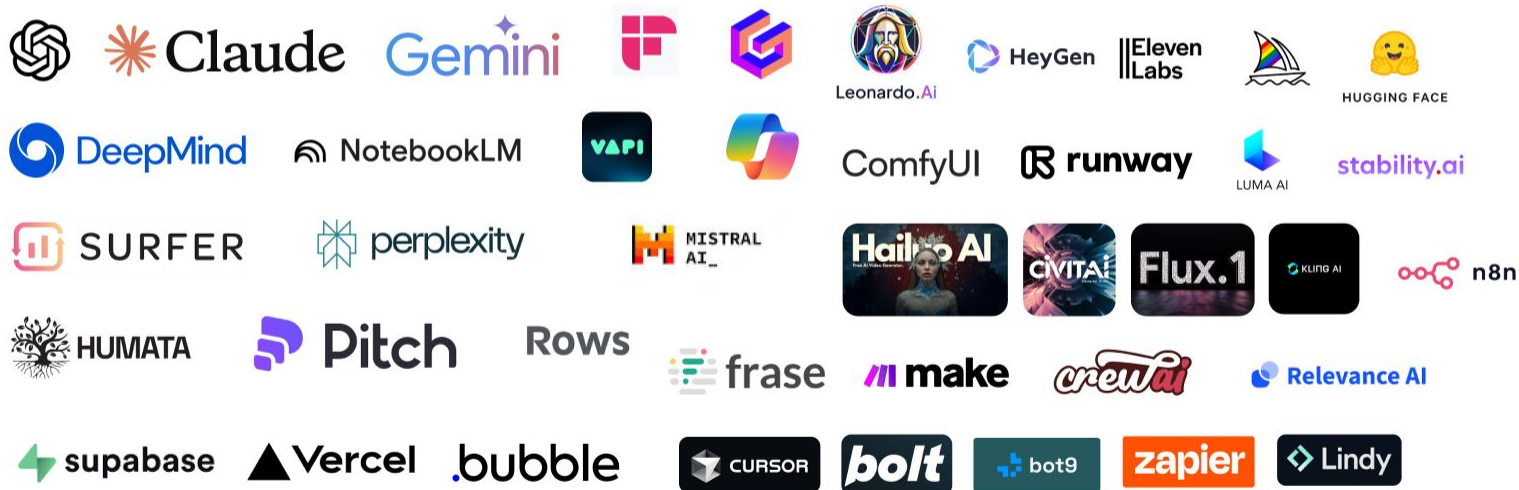

Projects to explore

- ◆ Create apps like data processor , Image generators , travel planners
- ◆ Build your No-code SaaS MVP & acquire first 100 users
- ◆ List it on product hunt to get perks & grants
- ◆ Solve a real-world business problem for a start-up with AI

Level 6

Connect the dots for a BIGGER picture

Projects to explore

- ◆ Build A Super Agent
- ◆ Build An App That Solves A Problem

To future-proof yourself in this
AI First World, everyone
must master **all the 5 Levels!**

What superpowers will
this give you ?

Learning these levels will give you powers
that will keep you relevant

Power To **Think** AI

Power To **Build** With AI

Power To **Automate** With AI

Power To **Network** With AI
